Professional Summary

Aspiring Software Developer with a strong foundation in Java, Data Structures & Algorithms, and full-stack web development using React.js and Node.js. Experienced in designing and deploying scalable web applications and AI-integrated platforms, with an emphasis on clean backend architecture, robust REST APIs, and responsive user interfaces. Consistent academic top-performer with a CGPA of 9.73, recognized at hackathons, and driven by a passion for building real-world software that makes a meaningful impact.

Education

Bharati Vidyapeeth Institute of Management & Information Technology <i>Master of Computer Applications (MCA)</i>	Navi Mumbai, Maharashtra 2025 – 2027
University of Mumbai <i>Bachelor of Science in Computer Science</i> CGPA: 9.73 / 10.0	Mumbai, Maharashtra 2022 – 2025

Technical Skills

Languages	Java, JavaScript, TypeScript, Python, SQL
Frontend	React.js, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend	Node.js, Express.js, REST APIs, Prisma ORM
Databases	MySQL, MongoDB, PostgreSQL
Tools	Git, GitHub, Postman, VS Code, IntelliJ IDEA, Linux, Vercel
Concepts	Data Structures & Algorithms, OOP, DBMS, Operating Systems

Projects

ASPIRAI – AI Career Coach <i>Next.js, React, Tailwind CSS, Prisma, NeonDB, Clerk, Inngeist, Gemini API</i>	[GitHub] [Live Demo]
- Developed a comprehensive AI-powered career platform offering resume building, interview preparation with mock Q&A sessions, and real-time industry-specific career insights powered by the Gemini API. - Implemented automated background workflows using Inngeist for scalable, event-driven task processing, ensuring high reliability and fault tolerance under concurrent user load. - Designed a fully responsive UI with role-based access control via Clerk authentication, and fine-tuned backend REST APIs to optimise performance across multiple simultaneous user interactions. - Leveraged NeonDB (serverless PostgreSQL) with Prisma ORM to manage structured user data, resume snapshots, and session history efficiently at scale.	
Webynix – AI Website Builder <i>React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, OpenRouter API, Stripe</i>	[GitHub] [Live Demo]
- Built a SaaS-grade AI-powered website generator that converts plain natural language prompts into fully functional, styled websites with an instant live preview and in-browser code editing panel. - Integrated secure user authentication alongside the Stripe payment gateway to support subscription tiers, billing history management, and plan upgrades within a polished user dashboard. - Implemented project versioning, multi-workspace management, and one-click export features, delivering a developer-friendly environment comparable to commercial low-code platforms. - Used TypeScript throughout the frontend and backend for strict type safety, reducing runtime errors and improving maintainability across the codebase.	

FoodyWeb – Online Food Ordering Platform

[\[GitHub\]](#) [\[Live Demo\]](#)

React, Node.js, Express.js, MongoDB, Razorpay

- Developed a complete end-to-end food ordering system featuring JWT-based user authentication, a dynamic menu with real-time cart management, order tracking, and Razorpay payment gateway integration.
- Deployed on Vercel and actively maintained; the platform has been adopted by 400+ users, earning a 5+ stars on GitHub and positive community feedback.
- Optimised Express.js backend APIs for concurrent request handling, implementing middleware-level error handling and request validation to improve system reliability and response times.
- Structured the MongoDB database with efficient schemas and indexing strategies to support fast menu queries and seamless order management operations.

Research & Publications

Data Security and Privacy in Cloud Computing

[Certificate](#)

- Presented a research paper at the International Conference on Emerging Trends, Innovations & Challenges in Information Technology (ICET 2026).
- Explored cloud computing security challenges including data privacy, encryption methods, authentication mechanisms, DDoS attacks, and threat mitigation techniques.

Certifications

- **Java Spring Framework 6, Spring Boot 3 & Spring AI** – Udemy Certification

[Certificate](#)

- **React and Redux – Complete Developer Guide** – Udemy Certification

[Certificate](#)

Achievements & Awards

- **Student of the Year** – Conferred the Student of the Year award during Bachelor's degree in recognition of exceptional academic performance and overall contribution to the department.
- **Consistent Top 3 Rank** – Ranked among the Top 3 students throughout all 3 years of the Bachelor's programme under the University of Mumbai, demonstrating consistent academic excellence.
- **Best Use of Technology – UAI Hackathon 2026** – Received the Best Use of Technology award for developing an innovative AI-based solution that addressed a real-world problem statement under a competitive time constraint.
- **Finalist – SIES Innov8 Hackathon** – Selected as a finalist among 150+ competing teams for presenting a technically strong and market-ready product prototype.

Positions of Responsibility

- **Technical Event Lead – [Manthan 2026]** – Led the organisation of a college-level technical event, managing a diverse team of 35+ members across event coordination, logistics, and technical operations to ensure seamless planning and successful execution.
- **ICET 2026 Event Coordination Team** – Contributed to the planning and execution of ICET 2026 by assisting in technical session management, participant coordination, and event operations in collaboration with faculty members and organizing teams.

Seminars & Workshops

- Attended a workshop on Data Analytics and Business Intelligence conducted by Foslipy C.S Pvt. Ltd.
- Participated in workshops and seminars on Web Development, Artificial Intelligence, and modern software technologies.

Extracurricular Activities

- Actively participated in inter-college technical fests, competitive coding events, and project exhibitions, showcasing problem-solving skills and collaborative development abilities.
- Interested in open-source development, UI/UX design, and continuously learning modern technologies in AI, cloud computing, and full-stack web development.
